1. Model Fit: The model explains 70% of the variance in the dependent variable ($R^2 = 0.70$). 2. Model Assumptions: The model assumptions are met, including linearity, homoscedasticity, and normality of residuals. 3. Model Performance: The model performs well on the test data, with a mean squared error (MSE) of 0.05.	1. Model Fit: The model explains 70% of the variance in the dependent variable ($R^2 = 0.70$). 2.
